STEP 1: Start with the white side of the paper facing up in a diamond position. Fold and unfold both diagonals.

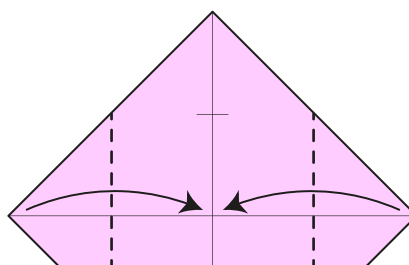

STEP 2: Bring the top corner down to the center point. Lightly pinch the middle of the top edge to mark a small reference point.

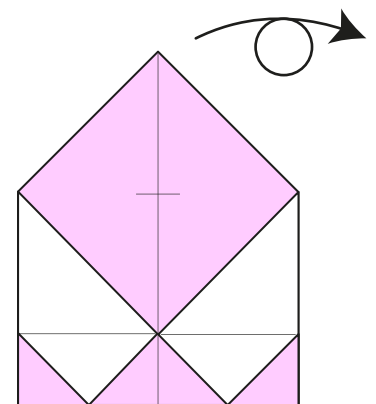

STEP 3: Fold the bottom corner up to meet the reference point you made in Step 2.

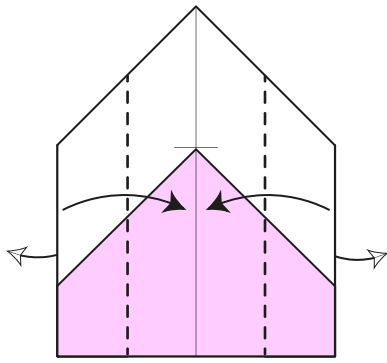

STEP 4: Turn the paper over.

STEP 5: Fold the left and right corners to the center point. The bottom edges should line up neatly.

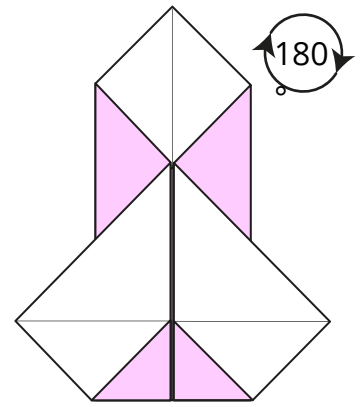

STEP 6: Turn the paper over.

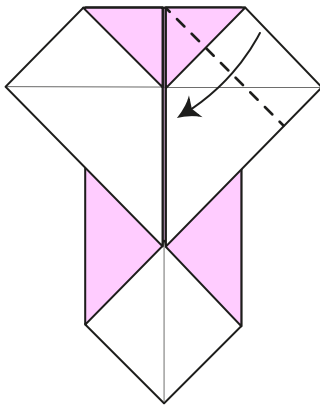

STEP 7: Fold the left and right edges to the centerline, but only fold the top layers.

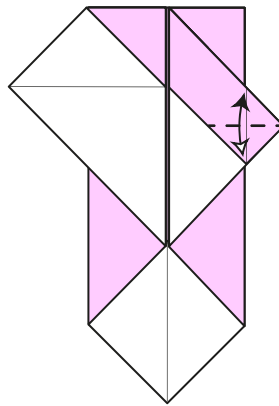

FOLDING TIP: The back layer will move forward when you fold it. Lift it gently while creasing to avoid unwanted crease marks!

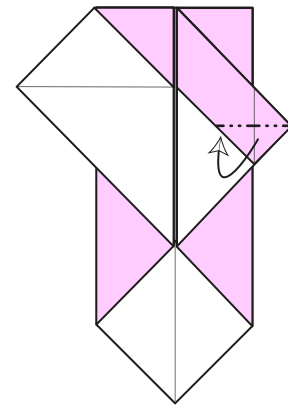

STEP 8: Rotate the model 180° clockwise.

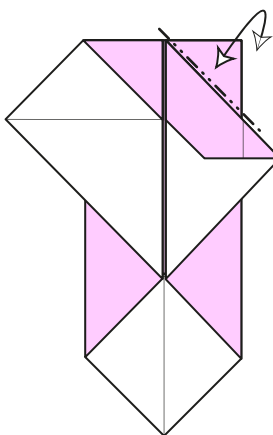

STEP 9: On the right side, fold the top edge of the top flap toward the centerline.

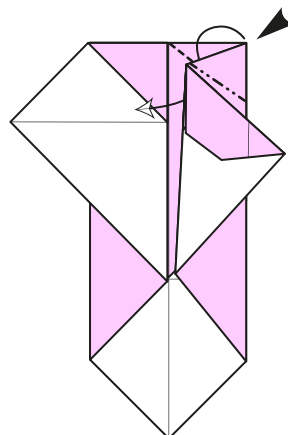

STEP 10: Fold only the top layer up and bring the bottom corner to the edge above. Crease well, then unfold.

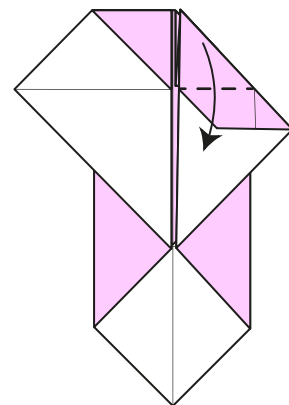

STEP 11: Using the crease from Step 10, reverse fold the flap and tuck it underneath the top layer.

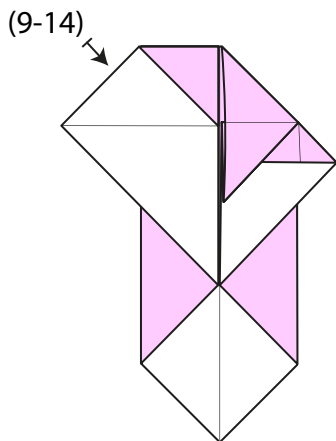

STEP 12: Fold the top-right triangle behind the model, using the edge of the top flap (Step 9) as a guide. Crease well, then unfold.

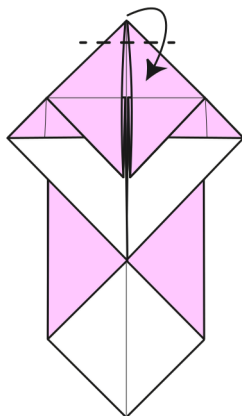

STEP 13: Inside reverse fold the top-right triangle using the creases you just made in Step 12.

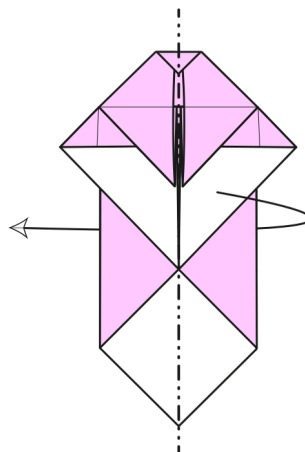

STEP 14: Fold the top flap created in Step 13 down.

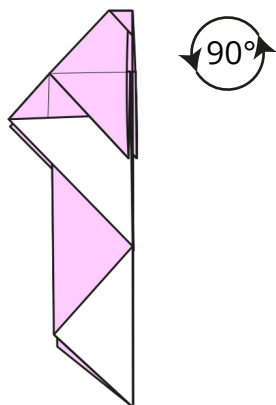

STEP 15: Repeat Steps 9 to 14 on the left side.

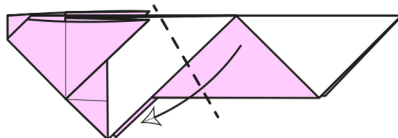

STEP 16: Fold the top corner down to form the snout. See the next diagram for reference.

STEP 17: Mountain fold the model in half, from right to left.

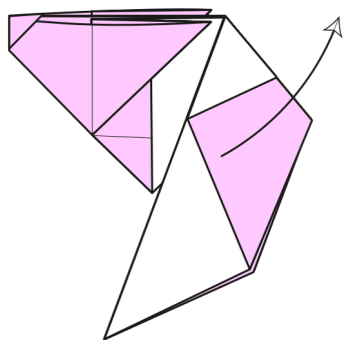

STEP 18: Rotate the model 90° counterclockwise.

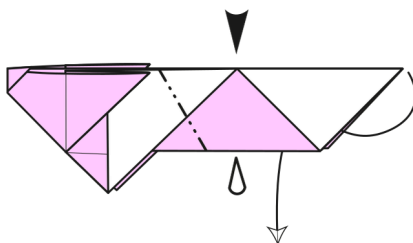

STEP 19: Fold the right corner (the tail) down along the dotted line.

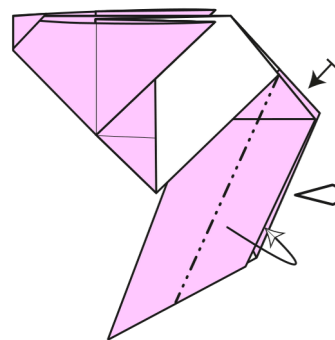

NOTE: Start the crease just after the pig's ear and leave a small gap between the tail and the front trotter. Crease well.

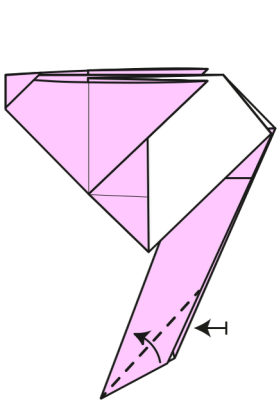

STEP 20: Unfold to Step 19.

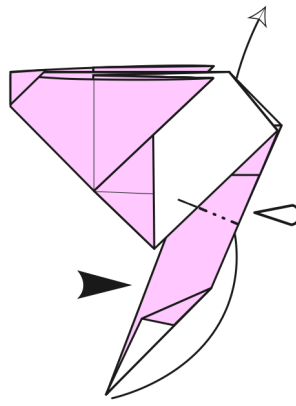

STEP 21: Open the flap made in Step 20 and fold the edges toward the centerline.

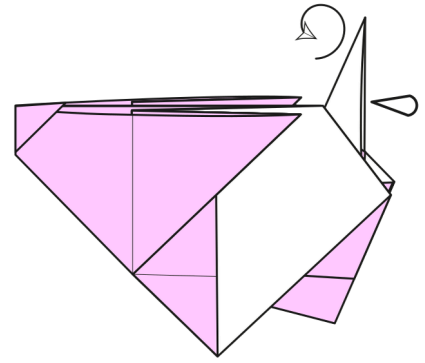

STEP 22: Open slightly the flaps made in Step 21 and fold the top edge toward the centerline. Repeat on the other side. (It's easier to do midair).

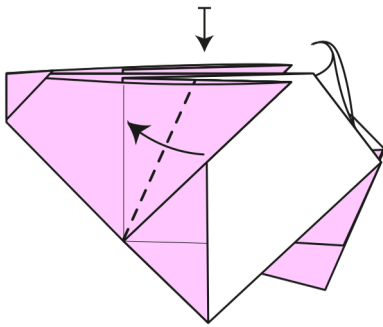

STEP 23: Fold the bottom edge of the tail to meet the left edge. Repeat on the other side.

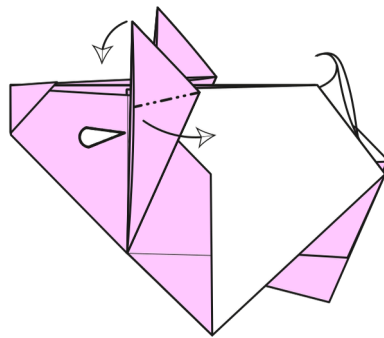

STEP 24: Open the flap from Step 21 again and fold the bottom corner up. The tail should stick out, but you should see only one paper layer.

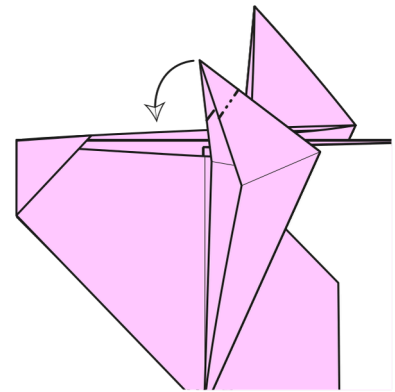

STEP 25: Open both layers of the tail and curl the corner.

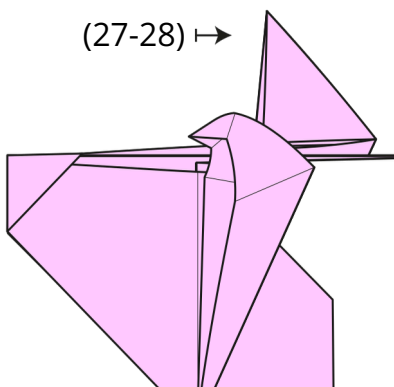

STEP 26: Open the ear and bring the top corner down to shape it. Use soft folds.

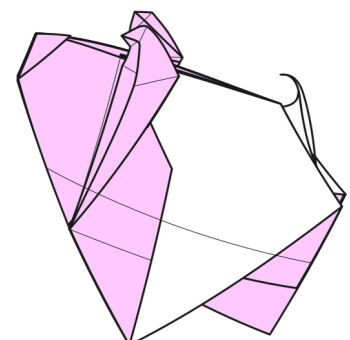

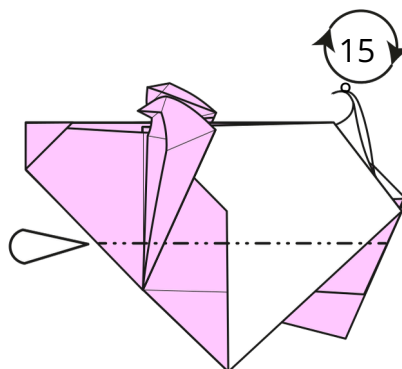

STEP 27: Once more, fold the top corner of the ear down using a soft, gentle fold to refine the shape

STEP 28: Try curling it inward or opening the layers and folding the tip down.

STEP 29: On both sides, give a gentle curve to the body to give your piggy a further 3-D look.

The Completed Origami Pig!
