**STEP 1:** Start with the side of the paper facing up in a diamond position. Fold and unfold the vertical diagonal.

**STEP 2:** Fold the horizontal diagonal from bottom to top.

**STEP 3:** Bring the top layer's top corner down to meet the bottom edge. Pinch the center lightly to make a reference point.

**STEP 4:** Fold the same top corner down to meet the pinch you just made. Then, unfold.

**STEP 5:** Fold the bottom edge up to the crease made in Step 4.

**STEP 6:** Fold the top corner down again along the existing crease (just the top layer).

**STEP 7:** Fold the bottom right corner up to meet the top corner. Align the bottom edge with the centerline.

**STEP 8:** Fold the top flap down along the line where the white and colored sides meet.

**STEP 9:** Repeat Steps 7 and 8 on the left side.

**STEP 10:** Unfold the top layer fold from Step 6.

**STEP 11:** Bring the top layer's top corner down to the nearest horizontal line. Pinch the center to mark a reference point.

**STEP 12:** Fold the pinch from Step 11 down to the nearest horizontal line (one layer only).

**STEP 13:** Fold the right wing along the dotted line. The crease should go from the wing's top and bottom corners. From this step, crease firmly to get sharp, neat wings.

**STEP 14:** Fold the wing's top flap to the right. Make the crease so it forms a 90° angle at the bottom edge, running from the top corner down.

**STEP 15:** Fold the wing's top left edge over to meet the right edge. You'll be folding through two layers.

**STEP 16:** Unfold the wing without flattening it.

**STEP 17:** Repeat Steps 13 to 16 on the left wing.

**STEP 18:** Fold the top corner down along the dotted line. There's no exact reference point.

**STEP 19:** Fold the right half of the model behind it.

**STEP 20:** Rotate the model 90° clockwise.

**STEP 21:** Fold and unfold the wings along the dotted lines to define the separation between the wings and the body. Repeat on the other side.

**STEP 22:** Pull down the flap from Step 18 to form the beak.

Mission accomplished! Your origami eagle has landed.
