**STEP 1:** Start with the white side of the paper facing up. Fold and unfold both diagonals.

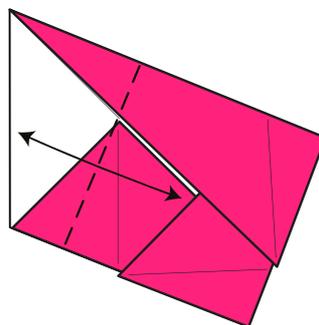

**STEP 2:** Fold the bottom edge up to meet the diagonal crease.

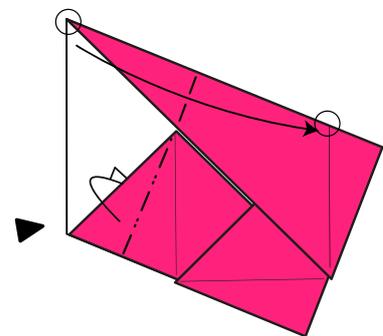

**STEP 3:** Fold the right edge to the diagonal crease. Use the reference point as a guide.

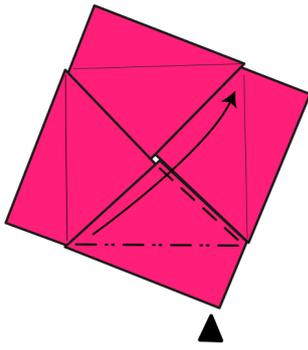

**STEP 4:** Fold the top edge to the diagonal crease. Again, use the reference point as a guide.

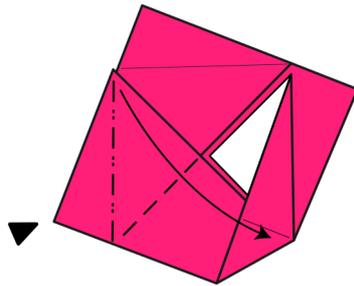

**STEP 5:** Fold the left edge over to where the layers overlap.

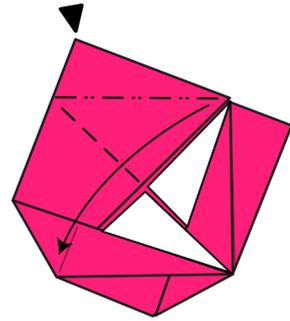

**STEP 6:** Fold the top left corner to the right, using the reference point and existing creases as guides. You'll need to reverse fold the bottom left part of the model.

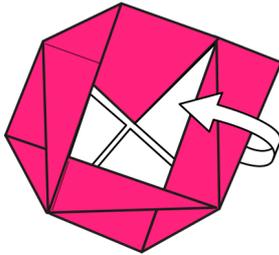

**STEP 7:** Fold the bottom flap upward along the existing creases. Align the edges, then squash fold.

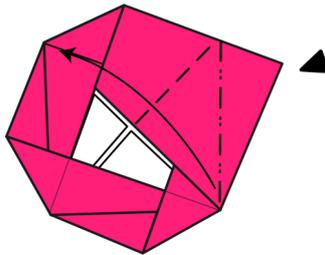

**STEP 8:** Repeat the same squash fold for the left flap.

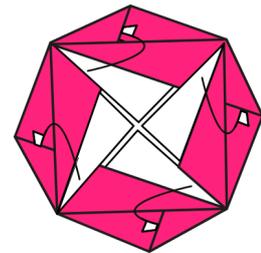

**STEP 9:** Repeat the same squash fold for the top flap.

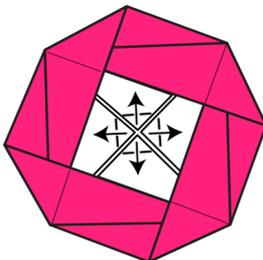

**STEP 10:** Untuck the flap located at the top right of the model and move it to the top.

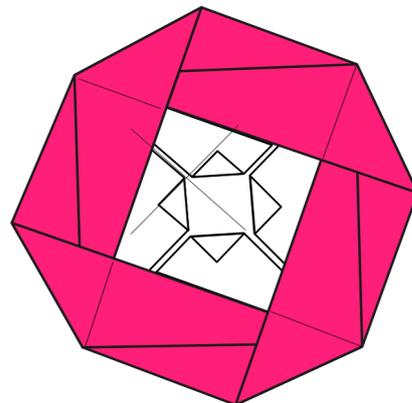

**STEP 11:** Fold the flap from Step 10 to the left using the existing creases as guides. Align the edges, then squash fold.

**STEP 12:** Tuck all the triangle tips into the flaps underneath them.

**STEP 13:** At the center, gently fold all corners outward.

**Your origami camellia is complete!**
