STEP 1: Start with the white side of the paper facing up in a diamond position. Fold and unfold along both diagonals.

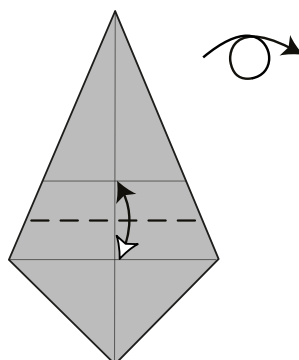

STEP 2: Fold the top edges in to meet the centerline.

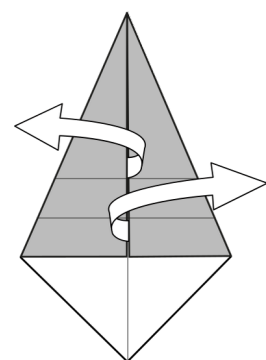

STEP 3: Fold the bottom corner up along the line where the colored and white sides meet, then unfold. Turn the paper over.

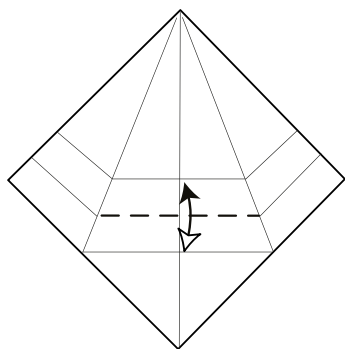

STEP 4: Fold the bottom corner up to the top corner. Then, unfold.

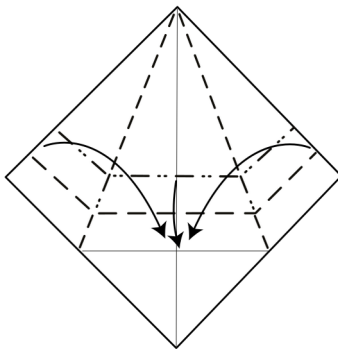

STEP 5: Fold and unfold the crease from Step 3 upward so it meets the crease from Step 4. Then, turn the model over.

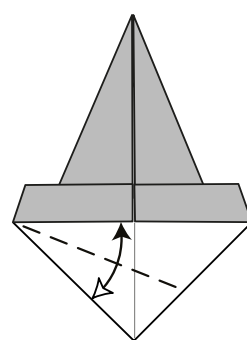

STEP 6: Open the top flaps.

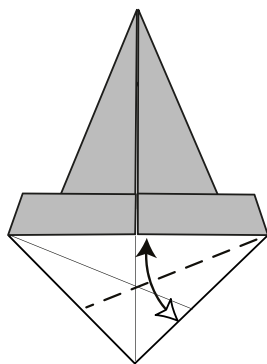

STEP 7: Fold along the crease you just made to reverse the fold (just the middle section).

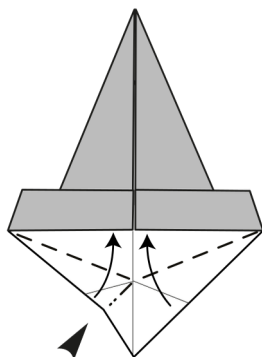

STEP 8: Collapse along the existing creases. Start with the two center folds, then fold in the sides inward.

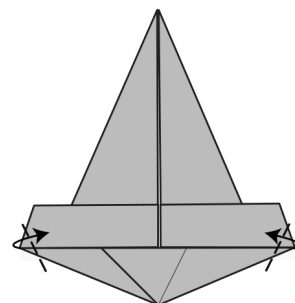

STEP 9: Fold the bottom left edge up to meet the line where the colored and white sides meet. Then, unfold.

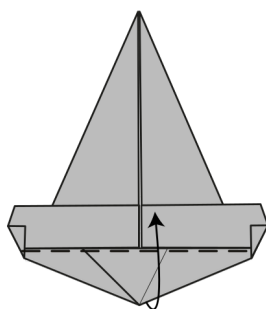

STEP 10: Repeat on the bottom right edge.

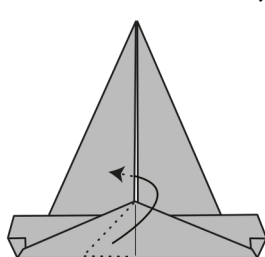

STEP 11: Collapse along the creases you just made. Fold the flap that sticks up to the left.

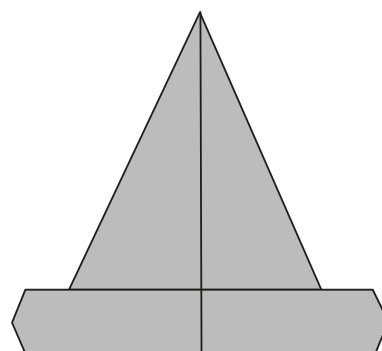

STEP 12: Slightly fold the bottom left and right corners inward.

STEP 13: Fold the bottom corner up along the line where the colored and white sides meet.

STEP 14: Tuck the middle flap (from Step 11) into the pocket behind it. Then, turn the model over.

The completed origami witch hat!
