**STEP 1:** Start with the white side of the paper facing up in a diamond position. Fold and unfold along the vertical diagonal.

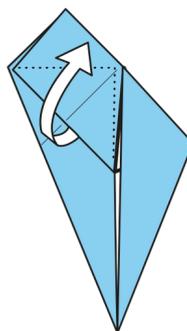

**STEP 2:** Fold the bottom left and bottom right edges in to meet the centerline.

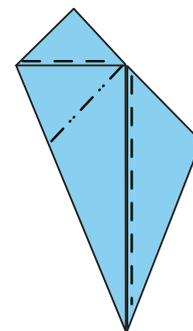

**STEP 3:** Fold the top corner down to meet the left corner, then unfold. Repeat for the right corner.

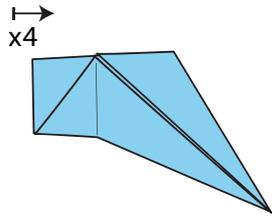

**STEP 4:** Make a inside reverse fold on the right corner area. The top flap will rest over the left flap.

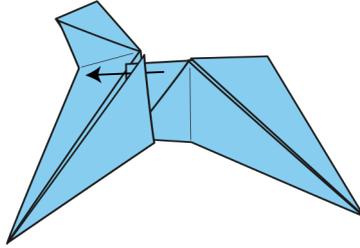

**STEP 5:** Untuck the left flap so it sits on top.

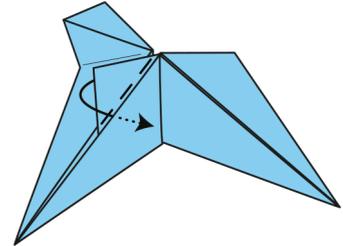

**STEP 6:** Reinforce the creases you already made (2 valley folds and 1 mountain fold).

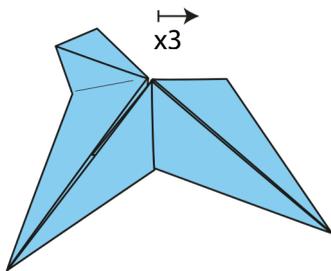

**STEP 7:** Repeat Steps 1 to 6 four more times. You'll end up with 5 identical units.

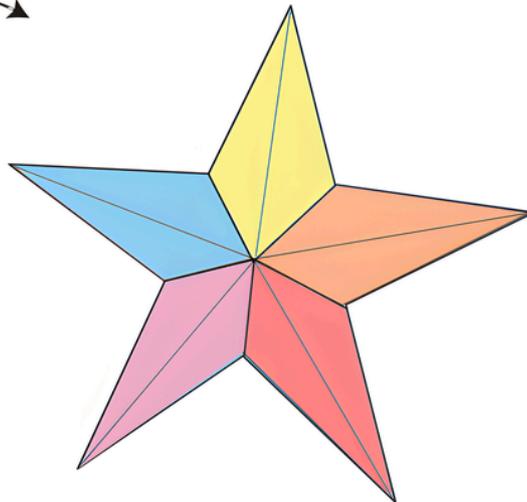

**STEP 8:** Take two units. Slide the triangular flap of one unit behind the right flap of the other unit.

**STEP 9:** Tuck the triangular flap of the right unit in between the top layers of the left unit's right flap.

**STEP 10:** Repeat the same connection three more times with the remaining units to complete the star.
