STEP 1: Start with the white side of the paper facing up in a diamond position. Fold in half vertically. Then, unfold.

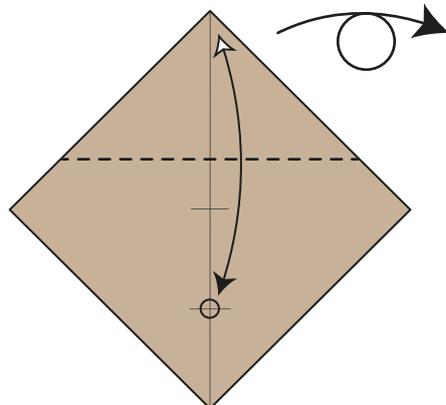

STEP 2: Turn the paper over.

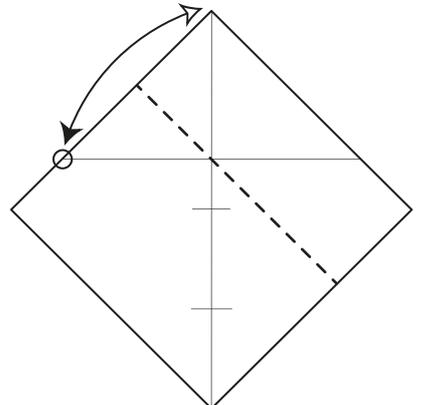

STEP 3: Fold the bottom corner up to the top corner and make a small pinch at the center. Then, unfold.

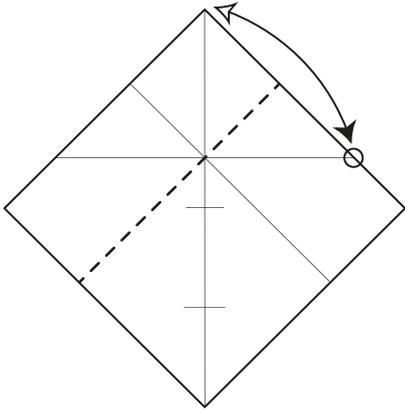

STEP 4: Fold the bottom corner up to the pinch mark you just made. Pinch again, then unfold.

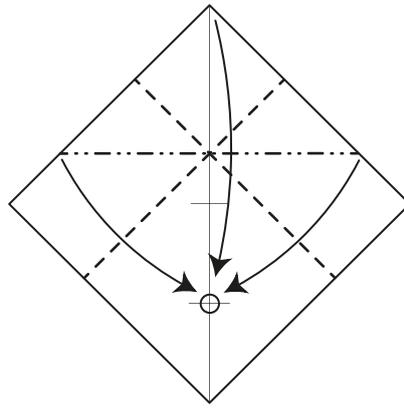

STEP 5: Fold the top corner down to the pinch mark. Then, turn the paper over.

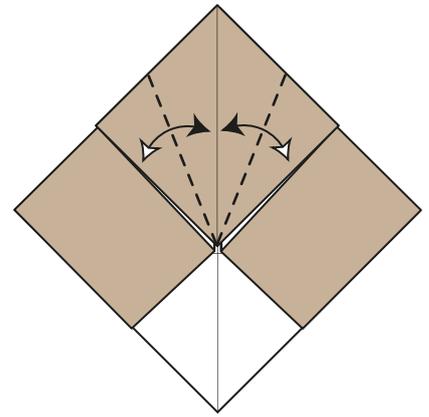

STEP 6: Fold the top corner to the circled point on the left, then unfold.

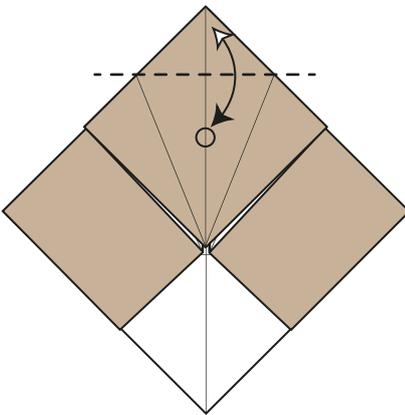

STEP 7: Repeat on the right side.

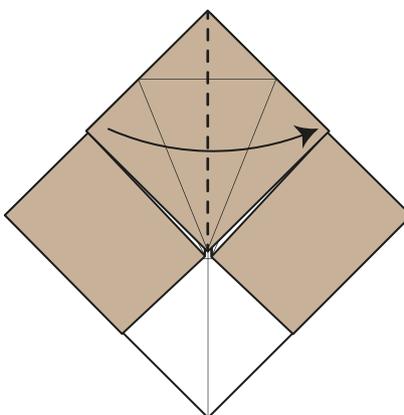

STEP 8: Collapse the paper along the creases made in Steps 4 to 6.

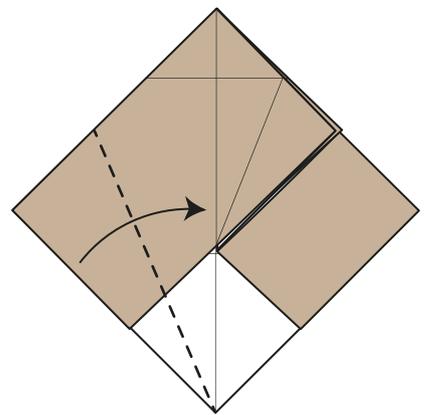

STEP 9: Focus on the top square area. Fold and unfold the bottom left and right edges to the centerline.

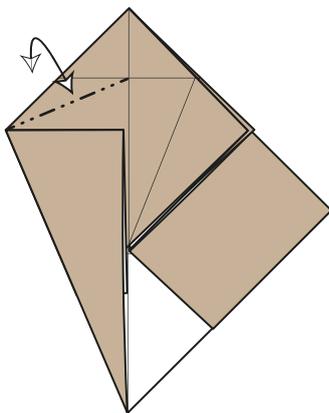

STEP 10: Using the creases you just made as a guide, fold the top corner down to meet the circled point.

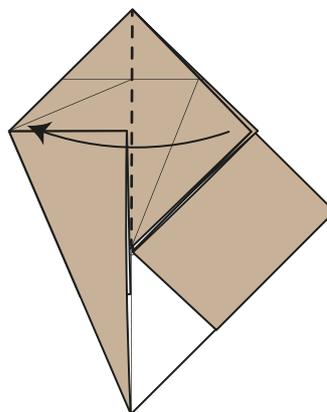

STEP 11: Flip the top left flap over to the right.

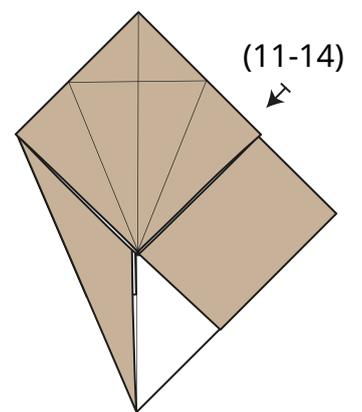

STEP 12: Fold the top bottom left edge in to meet the centerline.

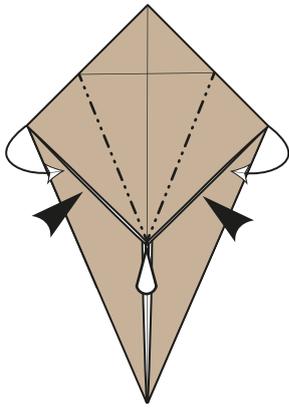

STEP 13: Mountain fold as shown- from the left corner to the point where the vertical and horizontal creases intersect.

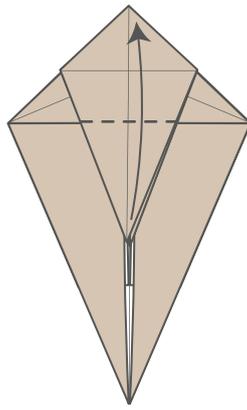

STEP 14: Flip the top right flap back over to the left.

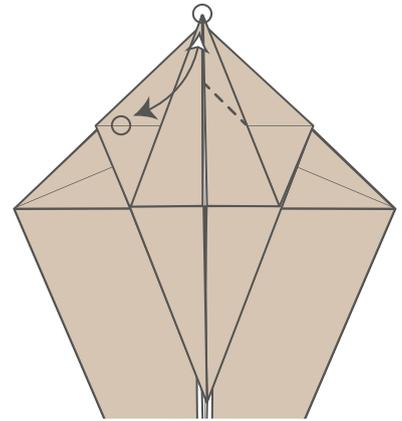

STEP 15: Repeat Steps 11 to 14 on the right side.

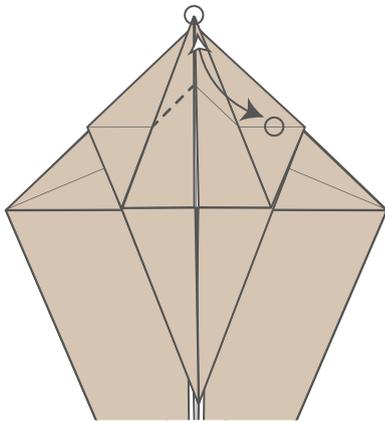

STEP 16: Open the layers. Inside reverse fold the left and right areas of the square (top flaps).

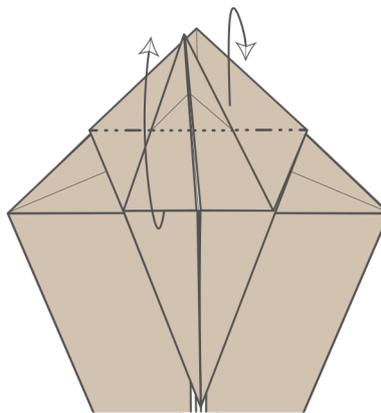

STEP 17: Fold the bottom corner of the top flap up to meet the top corner.

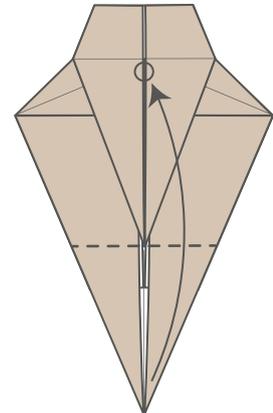

STEP 18: Fold the right edge of the top flap to the horizontal crease. Only crease from the centerline to the right edge. Then unfold.

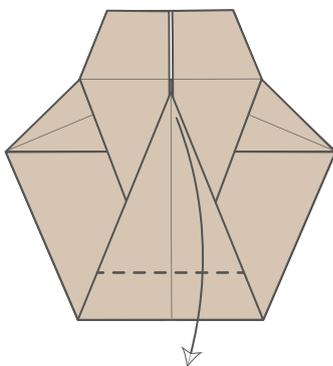

STEP 19: Repeat on the left side.

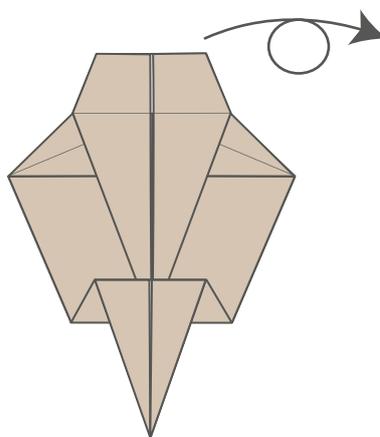

STEP 20: Fold the top triangle section to the back of the model. The front flap will now sit on top.

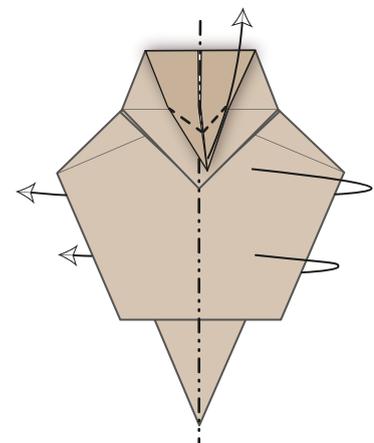

STEP 21: Fold the bottom corner up to the circled point.

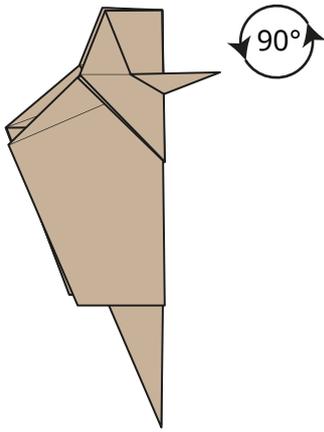

STEP 22: Fold the top flap down along the dashed line.

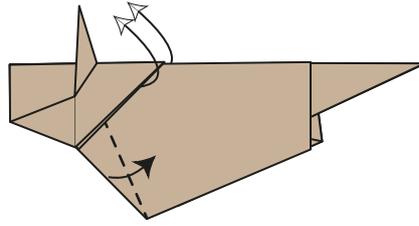

STEP 23: Turn the model over.

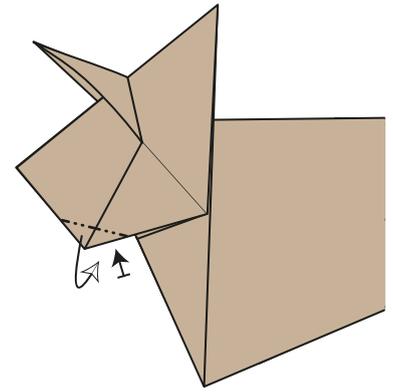

STEP 24: Mountain fold the model in half from right to left. At the same time, fold the top flap along the existing crease. It should stick out.

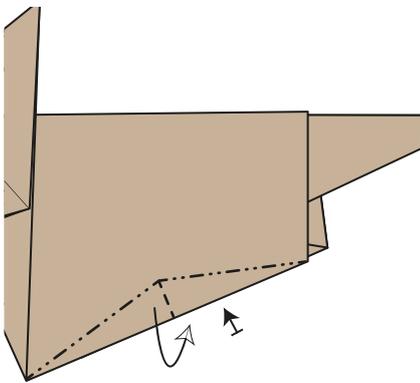

STEP 25: Rotate the model 90° counterclockwise.

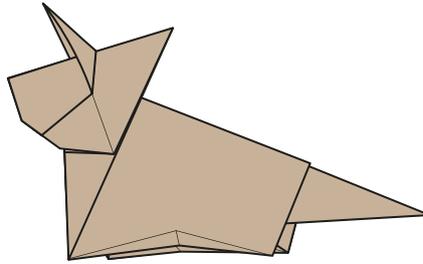

STEP 26: Pivot the head to the left using the existing creases.

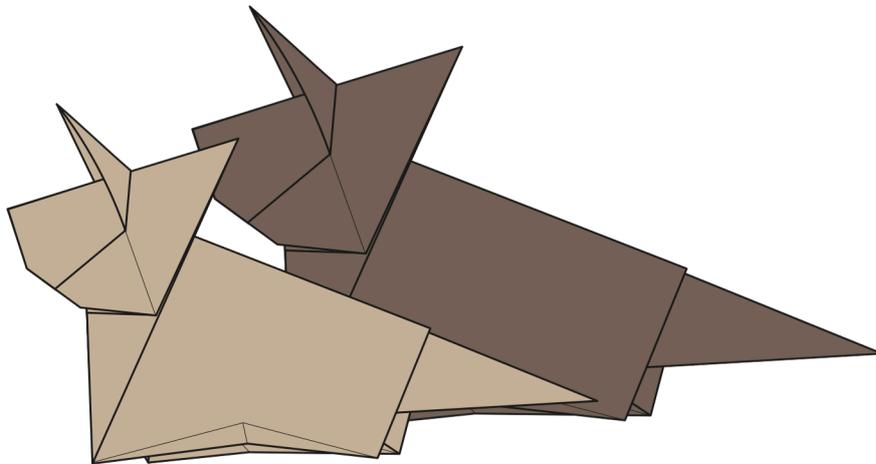

STEP 27: Mountain fold the bottom corners of the head as shown.

STEP 28: Gently round the bottom edges inward to shape the front and back legs.

Your origami Styracosaurus is ready to roam!
