STEP 1: Start with the white side facing up in a diamond position. Fold in half along the vertical diagonal, then unfold.
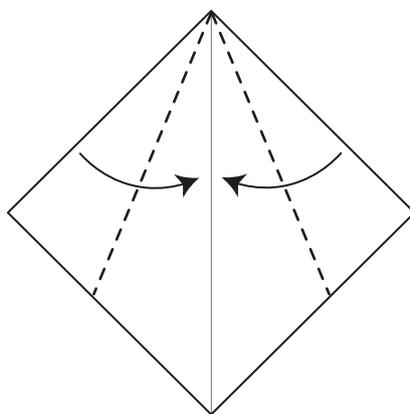

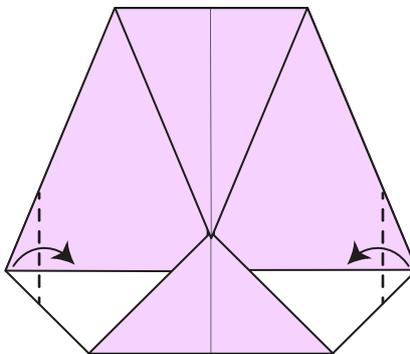

**STEP 2:** Fold the left and right edges to meet the vertical centerline.

STEP 3: Fold the bottom corner up along the dashed line. The bottom corner should land slightly above the horizontal line where the layers meet.
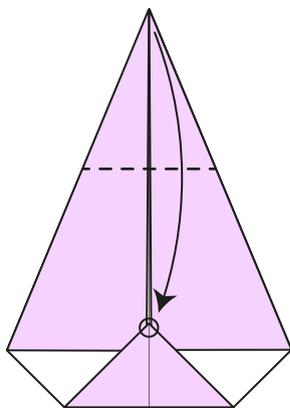

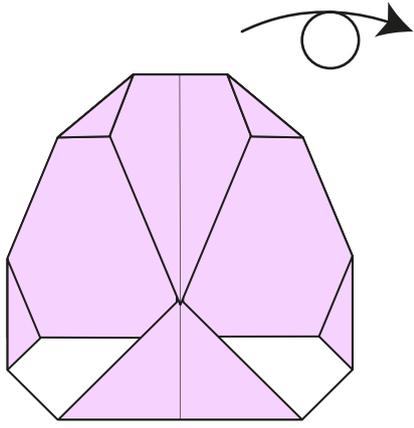

STEP 4: Fold the top corner down to meet the bottom corner from Step 3.

STEP 5: Fold the left and right corners inward. There is no exact reference point, just fold them evenly and symmetrically.
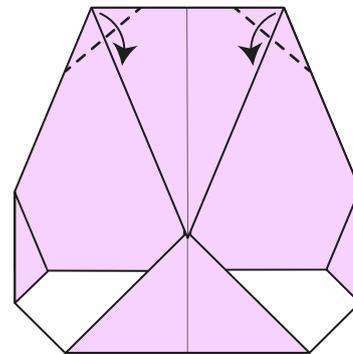

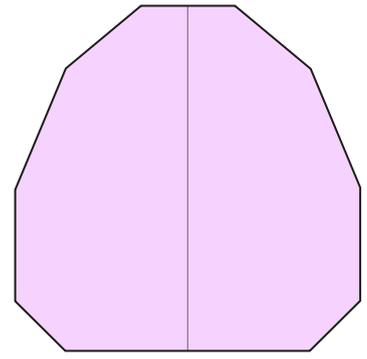

STEP 6: Fold the top left and right corners inward. Again, there is no specific reference point, just keep both sides even.

STEP 7: Turn the model over.

FOLDING TIP:
Gently fold the model in half to check if you folds are symmetric and adjust as needed.

Your origami egg is complete!
